

RISHI SHRIVASTAVA

Synopsis: Having 1.7 years of Experience, primarily in the Airline Domain in areas of Application Development and Maintenance.

EXPERIENCE SUMMARY

Has over 1+ year of experience in applications Development

Experience in Application Development, Maintenance & Support.
Knowledge of Quality processes.
Flexible enough to adapt to new environments.
Sound knowledge in analysis of functional issues.

QUALIFICATION

Degree	Institute	Year
Bachelor of Engineering (Information Technology)	Technocrats Institute of Technology, Bhopal	2017
Higher Secondary Education	Savior Convent Sr. Sec. School, Bhopal	2013

Areas of Experience-

Industries-
Global Travel & Transportation
Languages-
Java, Restful & SOAP Web services
Angular 4, 6
HTML5, CSS

RDBMS-
MySQL
OS-
Windows 7, 8, 10

Framework-
Spring Boot, Micro Services

Tools Used-
Intellij, Eclipse
Version One, Clear Case, Gradle, Maven, Jenkins, Sonar Lint, SOAP UI, Postman, Redux Tool, GIT

SDLC Models-
Agile & Waterfall Methodologies

RISHI SHRIVASTAVA

Working with Hexaware Technologies Ltd. From November 2017 – Till date.

PROJECT EXPERIENCE

SNAPP Rewrite: Single Network Application (SNAPP) is a project to create a common tool that enables agents in the support of all airport activities. This will be an encompassing application for all the different types of airports, both proprietary and common use. The application will assist in guiding the agents on the processes they need to complete at the airport using an interface. This interface will eliminate the use of native Deltamatic by agents at the airport in the different functional areas. The use of enterprise solutions will be incorporated to allow for maintainability and re-use of common elements across functions.

Type: Development

Domain: Airlines

Technology/Framework: Java, Angular 6, HTML5, CSS, Spring Boot, Rest Web services.

Duration: May 2018 till date

Role & Responsibilities:

- Created API using Rest web services in MVC architecture.
- Experience in implementing Spring Boot framework.
- Experience in upgrading the system as per the requirement of client with coordination of R&D team.
- Experience in testing for the new features release.
- Experience in writing Junit test cases.
- Designed UI with Angular 6 material design, HTML5/CSS taking Figma screens provided by client into reference.
- Created responsive web design using Angular and did data manipulations to display data in company's standard format.
- Clear understanding of Software Development Life Cycles (SDLC).
- Good Knowledge of MySQL.
- Understand users and process requirements and ensures those requirements can be achieved through high-quality deliverables.
- Collaborating with developers across multiple teams to develop and build consensus on common re-usable application components.
- Participating in Scrum meeting on daily basis.
- Worked in an Agile environment.
- I have been part of code refactor team where I have optimized the existing code to make it more understandable and reusable.

RISHI SHRIVASTAVA

- Worked on CVA (Test Data Utility) through which gained knowledge in angular, spring boot concepts and REST API development and tested developed Rest APIs using Postman.

Client-Value Add-on (CVA) - Test data utility which give us flexibility for creation of PNRs and retrieval of different passengers and displays the information about them. And retrieval of different flights like - COG, Shuttle, Early etc.

SNAPP BAU: Single Network Application (SNAPP) is a project to create a common tool that enables agents in the support of all airport activities. This will be an encompassing application for all the different types of airports, both proprietary and common use. The application will assist in guiding the agents on the processes they need to complete at the airport using an interface. This interface will eliminate the use of native Deltamatic by agents at the airport in the different functional areas. The use of enterprise solutions will be incorporated to allow for maintainability and re-use of common elements across functions.

Type: Development & Maintenance

Domain: Airlines

Technology/ Framework: Java, GWT, SOAP, Rest Services.

Duration: Feb 2018 to May 2018

Role & Responsibilities:

- Worked on production defect fixing.
- Understood MVC framework, GWT and airline concepts by various KT sessions.
- Worked in an Agile environment.
- Attended various CR meetings and understood the business requirements.
